ABOUT ME

Creative and detail-oriented Web Developer and Web Designer with strong skills in both custom frontend development (HTML, CSS, JavaScript) and WordPress website creation. Experienced in building responsive, modern interfaces, customizing themes, using page builders, and integrating essential plugins while maintaining clean structure and smooth user experience. Skilled in applying on-page SEO practices, optimizing layouts for performance, and designing visuals with Canva. Known for delivering polished, user-friendly websites across different industries and efficiently using tool like Git to streamline development.

WORK EXPERIENCE

ENNOVITEC, UAE, *Web Developer*

07/2025 – Present

- Designed and developed responsive websites using HTML, CSS, JavaScript, and WordPress to meet client specifications and brand guidelines.
- Maintained and optimized multiple client websites by performing daily SEO tasks, improved website SEO scores by 60–70% using Rank Math optimization, and enhancing site visibility.
- Managed social media platforms (LinkedIn, Instagram, Facebook) to support client branding, engagement, and digital presence.
- Contributed to the development of POS applications by assisting with UI/UX design, front-end structure, and feature implementation.
- Developed a complete travel ticket booking website with optimized user flows, clean layout, and functional booking features.
- Created digital assets, banners, and marketing visuals using Canva to support website content and social media campaigns.
- Collaborated with cross-functional teams to troubleshoot issues, implement new features, and ensure timely delivery of client projects.

CODETECH IT SOLUTION, *Intern*

12/2024

- Gained hands-on experience with AWS cloud platforms, working with core services to understand cloud architecture and deployment workflows.
- Created and configured EC2 instances and virtual machines to support testing, hosting, and application deployment environments.
- Set up and managed IAM users, roles, and permissions, ensuring secure and structured access control across cloud resources.
- Deployed a fully functional static website on AWS, utilizing S3, EC2, or hosting configurations as part of the internship project.

QUEST GLOBAL, *Trainee Engineer*

12/2021 – 01/2023

- Trained in core programming languages including VC++, C++, and Python, gaining strong foundational knowledge in software development.
- Contributed to multiple small-scale internal projects, supporting coding, debugging, and testing activities as part of the engineering team.
- Demonstrated quick learning, adaptability, and attention to detail while supporting project tasks and meeting assigned timelines.
